

12 February 2026

Headteacher - Tony Head

Dear Parents

On Tuesday 10 February 2026, we joined schools and youth organisations across the UK in celebrating **Safer Internet Day**.

This year's theme, "**Smart tech, safe choices – Exploring the safe and responsible use of AI,**" focused on helping children understand how to use artificial intelligence safely, responsibly and with confidence. AI tools are becoming part of everyday life, so it is important that children learn how to navigate them thoughtfully.

In school, we explored how AI can influence:

- the news and content we see online,
- the way we learn and complete homework,
- and the risks of misuse, such as realistic scams or altered images.

To help continue these important conversations at home, here are some simple ways you can support your child:

Helpful resources

- Try the [UK Safer Internet Centre's interactive quizzes](#) together.
- Read their **top tips for parents and carers** to build your own confidence [here](#).
- Share the UK safer Internet Centre's [top tips for children and young people](#) with your child to reinforce key messages.

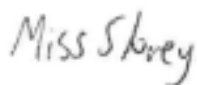

Conversation starters

Talking regularly about online life helps children feel supported and more likely to speak up if something worries them. You might like to use one of these prompts:

- Have you ever used an AI tool? What was it like?
- Is there anything about AI that worries you?
- What advice would you give a friend about using AI safely?
- What could I do to help you feel even safer online?

If you have any questions or concerns about online safety, please speak to your child's class teacher or a member of our Safeguarding Team. We are always here to help.

Kind regards

Holly Storey
